AND

SHRUBS

*Collected and Grown*

*by*

*WM. F. BASSETT & SON*

*Hammonton N. J.*

*U. S. A.*

FOR THE SEASON OF 1895-6

**TERMS AND REMARKS.**

The prices given in this list include careful packing which will be done as our judgement indicates, unless special instructions are given,

Bills are due and payable in 30 days from date and interest will be charged on bills not paid within 60 days from date,

Unknown customers should either enclose cash with the order or give good reference,

Where large lots of collected plants are wanted, sufficient time should be allowed for collecting as frequently the plants on one order are over 100 miles apart,

Long lists of plants, less than 6 of a kind will be charged at retail prices,

The collecting of desirable native plants and shrubs is our specialty, We have definite localities, for every plant in our list, where good thrifty plants can be collected,

**CENTROSEMA VIRGINICA**  
 Northern grown seed \$1 per pound.  
 Special price on lots of 5 pounds or more

## HARDY PERENNIALS.

The following plants are selected from the general list as particularly desirable for general culture. In addition to these, the general list contains many species that are rare, unique, or valuable for special purposes

### **ACHILLÆA "THE PEARL"**

Almost indispensable to the florist for the production of white flowers for cutting during the summer months. The flowers are purest white, full double and borne in good sized clusters on long stems. It is of the easiest culture. 40 cts per doz., \$2,50 per 100.

### **ACHILLÆA MILLEFOLIUM ROSEUM.**

This has the fern-like foliage of *A. millefolium* with flowers of an exquisite shade of rose red. It is elegant as a cut flower and a very fine garden plant. 60 cts. per doz., \$4 per 100.

### **BOLTONIA LATISQUAMÆ.**

Four feet high, freely branched and covered in August with hundreds of large lilac colored flowers. As a garden plant it has few equals. 80 cts. per doz., \$5 per 100.

### **CENTROSEMA VIRGINICA.**

This perennial climber is one of the most distinct and beautiful plants in cultivation. It climbs over any support to the height of six feet producing its large pea shaped flowers freely for two months. The color is a pleasing shade of purple. It will bloom freely the first year from seed sown in the open ground. The best way is to sow the seed in the Fall and mulch it. If the seed is sown in the spring it should be first soaked thoroughly in HOT water. Price of plants \$1.50 per dozen, \$10 per 100. Price of seed 40 cts. per oz., \$4 per pound.

**GILLENIA TRIFOLIATA.**

A handsome plant two to three feet high with numerous fine, spreading branches, covered in June with beautiful pure white, peculiar shaped flowers. The foliage is handsome at all times and the flowers are so distinct that it should be planted more than it is. 75 cts. per dozen, \$4 per 100, \$35 per 1000.

**GERANIUM SANGUINEUM.**

Of dwarf compact habit forming a mat of dark green foliage, and covered in May and June with large crimson flowers. \$1.25 per dozen, \$7.50 per 100.

**HELIANTHUS ORGYALIS.**

This is said to be the best Helianthus in cultivation. The flowers are rich deep yellow in color, borne on long slender stems. \$1 per dozen, \$6 per 100.

CRIMSON EYE HIBISCUS.

**CRIMSON EYE HIBISCUS.**

This is the most beautiful strain of hardy Hibiscus yet offered and is deservedly popular. The flowers are 20 or more inches in circumference, as large as a good sized tea saucer, and pure white with a large crimson center. It is a beautiful combination of color and the effect of a large plant in full bloom is magnificent. It will succeed in wet or dry soil even under total neglect. It comes true from seed.

**PRICE OF PLANTS:**

**PRICE OF SEED:**

	Doz.	100	1000
Two yrs.	60 cts.	\$4	\$30
One yr.	50 cts.	3	25

	Crop of 1895
One ounce . . . . .	60 cts.
One pound . . . . .	\$6

**LOBELIA CARDINALIS.**

Flowers of the most vivid cardinal red, produced in good sized spikes. 50 cts. per dozen, \$1.75 per 100, \$12 per 1000.

## KOSTELETZKYIA VIRGINICA.

### A BEAUTIFUL NOVELTY.

This is a very distinct and beautiful hardy plant that is new to cultivation. It belongs to the Malvacæa but has none of the coarseness common to many plants of that order. It makes a bushy plant two to three feet high and for six weeks in summer is a mass of bloom. The individual flowers are from two to two and one half inches across, bright rosy pink, opening perfectly flat. It is very floriferous blooming freely the first year from seed,

#### Price of Plants:

First size tubers \$8.00 per 100  
Second size . . . 6.00 "

#### Price of Seed:

One ounce . . . . \$ 1.50  
One pound . . . . 18.00

### EUPHORBIA COROLLATA.

It would be hard to overestimate the value of this plant for florists use. The pure white flower-like bracts work in beautifully for bouquets and designs and will remain in perfect condition for nearly two months on the plant. As a garden plant it is very beautiful and wonderfully tenacious of life, even under neglect. 50 cts. per doz., \$3 per 100, \$25 per 1000.

### EULALIA GRACILLIMA UNIVITTATA.

This elegant grass is very desirable for planting among shrubbery and hardy plant borders. We offer extra fine two year clumps at 70 cts per dozen, \$5 per 100. Strong young plants \$2 per 100, \$18 per 1000.

### EULALIA JAPONICA ZEBRINA.

Strong two year clumps, 70 cts. per dozen, \$5 per 100. Young plants, \$2.50 per 100, \$18 per 1000.

### LIATRIS GRAMINIFOLIA.

The various species of *Liatris* are all showy, having purple brush-like flowers in spikes. *L. graminifolia* is however much more beautiful than *spicata*, *scariosa*, *punctata*, or any of the other similar species. A feature of *L. graminifolia* is the fact that it will succeed on the sea shore in almost pure beach sand, even in places that are occasionally covered by the tide. Planted in large masses it makes a gorgeous color effect in September. 50 cts. per dozen, \$1.50 per 100, \$12 per 1000.

### LYSIMACHIA CLETHROIDES.

Two feet high with long curved racemes of pure white flowers in July. A valuable plant for florists. 60 cts. per doz, \$4 per 100,

### LYTHRUM SALICARIA SUPERBA.

Four feet high with long spikes of rose colored flowers. Very showy. Both the flowers and spikes are larger and more showy than the type. \$1.25 per dozen, \$8 per 100.

### MERTENSIA VIRGINICA.

A wonderfully beautiful flower, springing up at the opening of spring and forming immediately a mass of luxuriant foliage and beautiful blue flowers which are borne in large clusters on stems fifteen inches high. The buds are pink changing to blue as they open. It does best when planted in the fall. 40 cts. per dozen, \$2 per 100, \$18 per 1000.

*NYMPHÆA ODORATA MINOR.*

### MYMPHÆA ODORATA MINOR.

Aquatic gardening has largely increased in the last few years and many very beautiful varieties of water lilies have been brought to notice, but there are few of them however that are more beautiful than the small flowered *N. odorata minor* of the Pine Barrens, and none equal it in ease of management and freedom of bloom.

**It is not necessary to have an expensive tank**

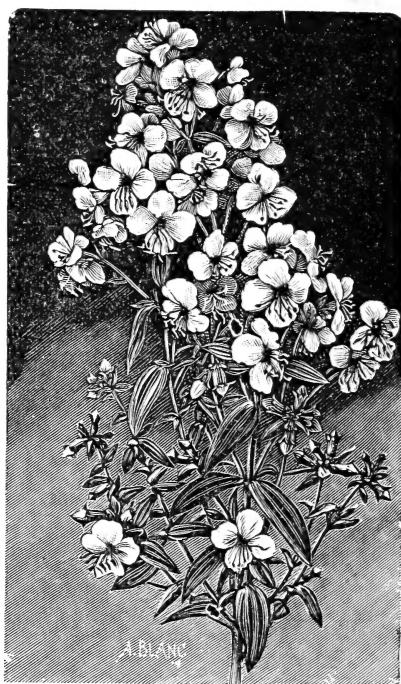

as it will grow to perfection in an old butter tub. 60 cts. per dozen, \$4 per 100, \$30 per 1000.

### PHLOX DIVARICATA.

This species has beautiful azure blue flowers in April. It is but little known in gardens but its great beauty should find it a place in all collections. It grows fifteen inches high with good sized flower clusters. 75 cts. per dozen, \$4 per 100, \$35 per 1000.

### PLUMBAGO LARPENTÆ.

Of very dwarf compact habit, covered in August with intense blue flowers. 60 cts. per dozen, \$4 per 100.

RHEXIA VIRGINICA.

**RHEXIA VIRGINICA.**

A tuberous rooted plant growing one foot high, suitable for moist soil. Flowers deep pink, one inch across borne in good sized clusters. 50 cts. per dozen, \$2 per 100.

**HARDY FERNS.**

The following list of hardy ferns we place here for the convenience of those who wish to refer to this class of plants separately. They are also in the general list of plants.

**EVERGREEN SPECIES.**

	Per 100.		Per 100.

## SHRUBS AND TREES.

AZALEA VISCOSA.

## COREMA CONRADII.

An exceedingly rare and distinct Pine Barren shrub  
NEW TO CULTIVATION.

This is one of the rarest of the Pine Barren shrubs, occurring only in a few isolated localities, and has never been brought into general cultivation. The original locality discovered by Conrad and also that discovered by Rafinesque, have been destroyed. We have recently found a new locality where some very fine young plants can be collected.

Corema Conradii is a very distinct shrub growing about two feet high, and much branched, spreading on the ground. The foliage is short, needle shaped and evergreen. The flowers are a delicate shade of purple produced in tufts at the ends of the branches early in spring. Fine plants with ball of earth, \$10 per 100; without ball \$6 per 100.

## AZALEA VISCOSA.

A SPLENDID STOCK OF  
NURSERY GROWN PLANTS.

We have to offer this season a fine stock of two year transplanted Azalea viscosa. They are low bushy plants with abundant fibrous roots. This Azalea has so much real merit that it should be used extensively. It is one of the hardiest species, blooms very freely and is deliciously fragrant.

First grade plants, 1 to 2 ft. heavy . . . . .	\$10 per 100
Second grade, lighter, . . . . .	8 "
Collected plants, . . . . .	3.50 "

### ANDROMEDA ARBOREA.

We have a very fine stock of two year transplanted plants of this beautiful shrub. The flowers are very showy and the foliage turns to brilliant scarlet in Autumn. Strong nursery grown plants, \$4 per 100. Collected plants \$3 per 100, \$25 per 1000.

### POTENTILLA FRUTICOSA.

This plant is new to our list. It is very dwarf and compact, thickly covered with foliage and producing an abundance of large yellow flowers throughout the summer. Nursery grown plants, \$3 per 100. Strong collected plants, \$2 per 100, \$15 per 1000.

### CORNUS PANICULATA.

Also new to our list. This species is of dwarf habit and thickly branched, with beautiful, dense foliage and an abundance of white flowers in June. Collected plants, \$4 per 100, \$35 per 1000.

LEIOPHYLLUM BUXIFOLIUM.

## LEIOPHYLLUM BUXIFOLIUM.

**F**OR Forcing into bloom for Easter decoration the beautiful Sand Myrtle or Leiophyllum offers more advantages than most of the plants now in use. It can be brought into bloom any time after Dec. 15th. The flowers are pure white, in clusters, all over the plant remaining in good condition for several weeks. We have to offer, this season, a fine lot of plants of this beautiful evergreen, grown especially for forcing. They have been two years transplanted and have solid balls of roots and are heavily set with buds.

FIRST CHOICE PLANTS	\$3 Per Doz. \$10 Per 100
SECOND " "	2.50 " 8 "

Collected plants \$2 per 100, \$15 per 1000.

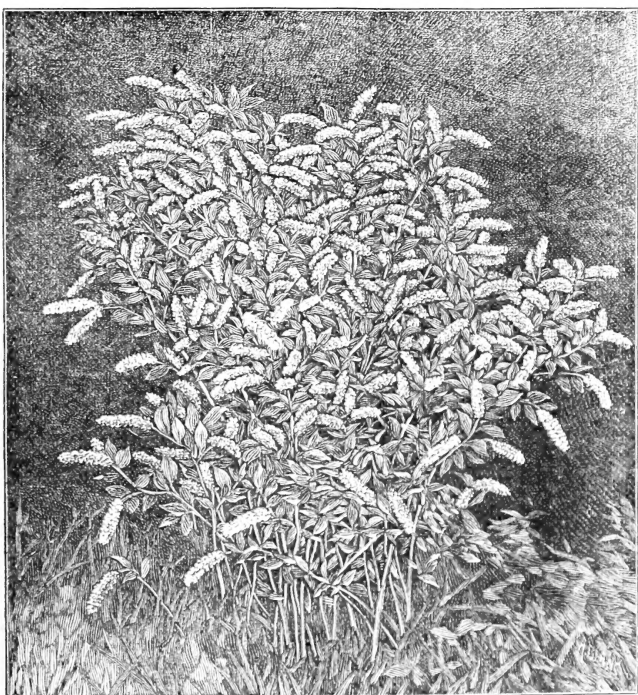

SEED of *Leiophyllum buxifolium*, \$1.25 per pound.
